<ul style="list-style-type: none"> Happy with the class. I want practical learning in Machine learning course just like FDS. Da Yan has been excellent in helping us to understand the concepts with utmost detail. Looking forward for more courses from him. :) excellent! Even though I found it was so hard to understand the lectures, I could still acquire a fair understanding of most of the topics by doing the research myself. On the other hand, the assignments were a great way to get a better understanding of the topics. He was very helpful, kind and well explanation was there it was good Good instructor and helpful professor. I enjoyed the assignments and mini-projects the most. They really solidified the class content. Very understanding and helpful professor. He has wealth of knowledge on the subject matter. He has lot of patience to answer students queries. He engages everyone in the class and after the class

Please comment on the performance of the TA, (if applicable), in this class (and please include their name; if there is more than 1 TA, you can comment on 1 or more). -

- As far I know she could not help us for most of the problem. But she is good at grading.
- TA Akshata is very helpful and understanding
- TA was Akshata Anil Parab. I had little interaction with the TA. I assume most of the TA's effort was in grading assignments.
- Good
- She was very helpful and she was good to students
- The TA was willing to help when asked. She seems to be dedicated to her work. However, through out the course, I asked her once about my doubt and she did not really understand my question.
- not bad
- Akshata - Very well supported and clarified our queries without hesitation.
- Good TA
- great
